

Comment Feed

This feed returns a paged list of comments for content or a user specified. Comments can be returned in two ways – flat list with most recent comment on the top and threaded list, with every level with most recent comment on the top. This list cannot be filtered or searched.

Since some comments can be created by anonymous users, the creator property contains all available fields for guests and registered users. But some properties may be set to null. For registered users only the Ucid, Title, LoginName and ProfileUrl properties contain valid values. For guests only the Title property contains the valid value. The Email and Website may contain data only if guest has entered any information into them. The Thumbnails property always has valid links.

Common properties

Property	Code	Jscript (JSON)	FML	XML
ID	var.Id	var.Id	<item-comment-Id>	../entry/Id
Text	var.Text	var.Text	<item-comment-text>	../entry/text
Created Date	var.DateCreated	var. DateCreated	<item-comment-dateCreated>	../entry/dateCreated
Level	var.Level	var.Level	<item-comment-level>	../entry/Level
Creator Ucid	var.Creator.Ucid	var.Creator.Ucid	-	../entry/creator/ucid
Creator Name	var.Creator.Title	var.Creator.Title	<item-comment-creator-title>	../entry/creator/title
Creator Login Name	var.Creator.LoginName	var.Creator.LoginName	<item-comment-creator-loginName>	../entry/creator/loginName
Creator Profile link	var.Creator.ProfileUrl	var.Creator.ProfileUrl	<item-comment-creator-profileUrl>	../entry/creator/profileUrl
Creator Email	var.Creator.Email	var.Creator.Email	<item-comment-creator-email>	../entry/creator/email
Creator Website	var.Creator.Website	var.Creator.Website	<item-comment-creator-website>	../entry/creator/website
Creator very small thumbnail link (25x25)	var.Creator.Thumbnails.VerySmall	var.Creator.Thumbnails.VerySmall		../entry/creator/thumbnails/verySmall
Creator small thumbnail link (50x50)	var.Creator.Thumbnails.Small	var.Creator.Thumbnails.Small		../entry/creator/thumbnails/small
Creator medium	var.Creator.Thumbnails.Medium	var.Creator.Thumbnails.Medium		../entry/creator/thumbnails/medium

thumbnail link (70x70)				
Creator large thumbnail link (90x90)	var.Creator.Thumbnail.s.Large	var.Creator.Thumbnails.Large		../entry/creator/thumbnails/large
Creator very large thumbnail link (120x120)	var.Creator.Thumbnail.s.VeryLarge	var.Creator.Thumbnails.VeryLarge		../entry/creator/thumbnails/veryLarge
Creator custom thumbnail link	var.Creator.Thumbnail.s.Custom(size)	-	<item-comment-creator-thumbnailUrl size=size>	-
Child Comments	var.ChildComments	var.ChildComments	-	../entry/childComments/<entry>

Access string

To get a comment list, the access string should be provided.

- /feeds/comments/0{ucid}/-/{list_type}?start-index={startIndex}&max-results={maxResults} - gets a list of comments for the content or user.
- {ucid} is the content or user ucid to get comments for. Mandatory parameter. It should follow '0'.
- {list_type} is type of the list returned. It is an optional parameter. If it exists, it should follow /-/. It can take the following values
 - flat (default value)
 - threaded

To determine the community to work with:

- FML - the current community is always used
- HTTP - the special URL format is used:
 - http://daapi.flux.com/2.0/00001/{format}/{ucid}/{access_string} - {format} determines the output data type; it can be XML or JSON; {ucid} is target community ucid.

Widgets compatibility

To use this DAAPI in widgets which do not have content ucid, but content permalink, skip the {ucid} parameter in access string and provide additional {q} parameter with permalink. This will initiate discovering process for the permalink:

- /feeds/comments/-/flat/?start-index=1&max-results=10&q=mgid:uma:content:shared:1234

Envelope

Container of comment list for the customers who use http to get data contains additional data – a number of comments.

Common properties

Property	Code	Jscript (JSON)	FML	XML
Number Of Comments	var.NumberOfComments	var.NumberOfComments	-	../numberOfComments
Action to prevent spam activity	var.SpamProtectionInfo.Action	var.SpamProtectionInfo.Action	-	../spamProtectionInfo/action
Restrictions period (in seconds), if any	var.SpamProtectionInfo.WaitPeriod	var.SpamProtectionInfo.WaitPeriod	-	../spamProtectionInfo/waitPeriod
