Community Detail Feed

This feed returns detailed information about certain community.

Properties

Property	Code	Jscript (JSON)	FML	XML
UCID	var.Ucid	var.Ucid		../ucid
Display name	var.Title	var.Title		../title
Domain name	var.DomainName	var.DomainName		../domanName
Number of Members	var.NumberOfMembers	var.NumberOfMembers		../numberOfMembers
Landing Page	var.LandingPageUrl	var.LandingPageUrl		../landingPageUrl
Very small thumbnail link (25x25)	var.Thumbnails.VerySmall	var.Thumbnails.VerySmall		../thumbnails/verySmall
Small thumbnail link (50x50)	var.Thumbnails.Small	var.Thumbnails.Small		../thumbnails/small
Medium thumbnail link (70x70)	var.Thumbnails. Medium	var.Thumbnails. Medium		../thumbnails/ medium
Large thumbnail link (90x90)	var.Thumbnails. Large	var.Thumbnails. Large		../thumbnails/large
Very large thumbnail link (120x120)	var.Thumbnails. VeryLarge	var.Thumbnails. VeryLarge		../thumbnails/veryLarge
Custom thumbnail link	var.Thumbnails.Custom(size)	-		-

Access string

To get detailed information about community, the access string should be provided.

- /feeds/community/

To determine the community to work with:

- FML - the current community is always used
- HTTP - the special URL format is used:

<http://daapi.flux.com/2.0/00001/{format}/{ucid}/{access string}> - {format} determines the output data type; it can be XML or JSON; {ucid} is target community ucid.

User's Communities Feed

This feed returns a list of the communities the particular user belongs to. This list is ordered and cannot be sorted.

Properties

Property	Code	Jscript (JSON)	FML	XML
UCID	var.Ucid	var.Ucid	<item-community-ucid>	../entry/ucid
Display name	var.Title	var.Title	<item-community-title>	../entry/title
Date joined	var.JoinedDate	var.JoinedDate	<item-community-user-joinedDate>	../entry/joinedDate
Number of Members	var.NumberOfMembers	var.NumberOfMembers	<item-community-numberOfMembers>	../entry/numberOfMembers
Landing Page	var.LandingPageUrl	var.LandingPageUrl	<item-community-landingPageUrl>	../entry/landingPageUrl
Profile link	var.ProfileUrl	var.ProfileUrl	<item-community-user-profileUrl>	../entry/profileUrl
Very small thumbnail link (25x25)	var.Thumbnails.VerySmall	var.Thumbnails.VerySmall		../entry/thumbnails/verySmall
Small thumbnail link (50x50)	var.Thumbnails.Small	var.Thumbnails.Small		../entry/thumbnails/small
Medium thumbnail link (70x70)	var.Thumbnails.Medium	var.Thumbnails.Medium		../entry/thumbnails/medium
Large thumbnail link (90x90)	var.Thumbnails.Large	var.Thumbnails.Large		../entry/thumbnails/large
Very large thumbnail link (120x120)	var.Thumbnails.VeryLarge	var.Thumbnails.VeryLarge		../entry/thumbnails/veryLarge
Custom thumbnail link	var.Thumbnails.Custom(size)	-	<item-community-thumbnailUrl size=size>	-

Access string

To get a list of communities for the user, the access string should be provided.

- `/feeds/communities/0{user_ucid}/?start-index={startIndex}&max-results={maxResults}&shuffle={shuffle value}`
- `{user_ucid}` is mandatory and it should follow '0'.
- `shuffle` is optional. If it is specified, the result set will be shuffled and only `{shuffle value}` elements will be returned. This value should be less or equal to `{maxResults}`.

Community Lists Feed

This feed returns a list of the community list. This list is always ordered by list name.

Properties

Property	Code	Jscript (JSON)	FML	XML
Id	var.Id	var.Id		../entry/id
Display name	var.Title	var.Title		../entry/title
List Type	var.ListType	var.ListType		../entry/listtype
Member count	var.MemberCount	var.MemberCount		../entry/membercount

Access string

To get a list of community lists, the access string should be provided.

- `/feeds/memberlists/?start-index={startIndex}&max-results={maxResults}&shuffle={shuffle value}`
- `shuffle` is optional. If it is specified, the result set will be shuffled and only `{shuffle value}` elements will be returned. This value should be less or equal to `{maxResults}`.
